

MARKETING TECHNOLOGIES

Marketing Technologies is proud to represent manufacturers that make a difference. Our companies are leaders, not followers. They excel in their manufacturing technologies and fields. Through technology, quality systems, and service, they provide the best overall value in the world marketplace. We are solution providers who listen, act, and respond to the dynamic requirements of our customers... that's the Marketing Technologies Difference. We have four offices to serve your manufacturing needs in the Western US:

Colorado Headquarters *States Covered: CO, NM, & WY*

Mark McIntyre: 303.442.4222 mmcintyre@marketingtech.com

Keith Brown: 720.304.0774 kbrown@marketingtech.com

Utah Office *States Covered: UT, NV, ID, & MT*

Joe Marietta: 801.648.7888 joe@marketingtech.com

Arizona Office *States Covered: AZ & CA*

Brent Hunter: 480.614.5562 brent@marketingtech.com

For more information on Marketing Technologies and the manufacturers we represent, free design tools and resources, news, and upcoming regional events, please visit: www.marketingtech.com

METALS

A&B DIE CASTING - Low/Mid-Volume Aluminum and Zinc Die Casting www.abdiecasting.com 

Focus: Tooling techniques to make die casting affordable
MT Difference: By combining high speed machining with simplified cost effective tooling, A&B makes die casting cost effective at volumes that other die casters would not consider

CASTECHOLOGIES - Zinc Castings www.castechnologies.com

Focus: Low to mid-volume zinc castings from graphite tooling
MT Difference: Die cast surface finish from low cost tooling; Excellent tolerances and low part cost

GENERAL FOUNDRY - Prototype and Production Sand, R/PM, & Permanent Mold Casting www.genfoundry.com

Focus: Small to large, aluminum and zinc castings from greensand, rubber/plaster mold and permanent mold processes
MT Difference: Low cost tooling, fast turn parts, machined complete to print; Unique greensand castings offer better surface and tighter tolerances; Best method for prototyping die castings; Cost-effective methods for low-med volumes

HARVEY VOGEL - Precision Metal Stampings and Fabrication www.harveyvogel.com 

Focus: Full capability fabrication from CAD and engineering to tooling and metal stamping including assembly
MT Difference: Over 100 stamping/fabrication presses offering the ultimate in quality, speed, & reliability for 60+ years

MAYSTEEL - Large Sheet Metal Enclosures www.maysteel.com 

Focus: Large sheet-metal enclosures for kiosks, data storage, and power systems
MT Difference: Maysteel is North America's leader in innovative sheet metal engineering. By using unique manufacturing technologies, Maysteel reduces cost and improves performance of your large enclosure design

MID-STATES ALUMINUM - Aluminum Extrusions www.midstal.com 

Focus: Custom and standard Aluminum Extrusions in all sizes; In-house machining, anodizing, and assembly
MT Difference: Multiple presses produce some of the smallest and thinnest-walled extruded profiles in the industry; Large extrusions up to 8" profile diameter; Lean manufacturing provides for short lead times

PACE INDUSTRIES - Aluminum, Magnesium, and Zinc Die Casting www.paceind.com  

Focus: Die castings from all alloys in all sizes; Machining and assembly
MT Difference: Largest die caster in North America; Superior analysis tools for Finite Element, Flow, Stress and Thermal Stress; Total turn-key capabilities

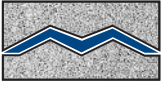

PARKWAY PRODUCTS - Thixomolding (Injection Molding of Magnesium) www.parkwayproducts.com 

Focus: Thixomolded magnesium for structural parts and cosmetic enclosures
MT Difference: Thixomolding allows you to design parts that are stiff, light, strong, recyclable, and inherently shielded

SIGNICAST - Ferrous Investment Casting www.signicast.com  

Focus: Low to high volume precision ferrous investment castings up to 100 lbs.; Machining and assembly
MT Difference: State-of-the-art, highly automated facilities utilize robotic systems for Continuous Flow Manufacturing (CFM); Process throughput of less than one week is a Signicast exclusive

MARKETING TECHNOLOGIES

CO Office: 303.442.2222

UT Office: 801.648.7888

AZ Office: 480.614.5562

www.marketingtech.com

PLASTICS

DESIGN OCTAVES - RIM: Reaction Injection Molding

www.designoctaves.com

Focus: Low volume enclosures and structural components; RIM is cost effective for 100 to 2,000 annually; In-house tooling, molding, painting and assembly; UL approved materials at 0.125" **MT Difference:** Low cost composite tools guaranteed for 10,000 cycles; Able to mold in metal inserts

FLEXAN - Rubber and Silicone Molding

www.flexan.com

Focus: Compression, transfer and LIM molder of engineered rubber and silicone components; Rubber-to-metal bonding

MT Difference: In-house materials development and

compounding; Class 10,000 clean room for medical products; Company-owned China facility for volume work

FM CORPORATION - Structural Foam and Gas Assisted Molding

www.fmcorporation.com

Focus: Structural plastics for cosmetic enclosures and internal parts; Product assembly

MT Difference: Low-pressure, low-stress molding; Parts up to 150 lbs. and 10 feet; In-house finishing and assembly

HIGH PERFORMANCE ENG. - Fast Cut Injection Molding Tooling & Parts

www.highperformanceengineering.com

Focus: Fast cut aluminum tooling and injection molded parts in one to five weeks

MT Difference: Speed; Low cost tooling and fast delivery of parts; Secondary services and onsite CNC machine shop

PARKWAY PRODUCTS - Tight Tolerance Injection Molding

www.parkwayproducts.com

Focus: Precision molding of engineered and high temperature resins; Product assembly

MT Difference: International supplier of high precision assemblies and components; Excellent quality and stability

PDM - PLASTICS DESIGN & MFG - Thermoforming and Plastic Extrusion

www.plasticsdesign-mfg.com.com

Focus: Close tolerance pressure formed components; Plastic extrusion; In-house cosmetic painting and shielding

MT Difference: Multi-piece assemblies that rival the look of injection molding with fast delivery and low tooling costs

ROLCO - Multishot Injection Molding

www.rolcoinc.com

Focus: Multishot molding allows for durable parts with different colors, materials & durometers in one process/one tool

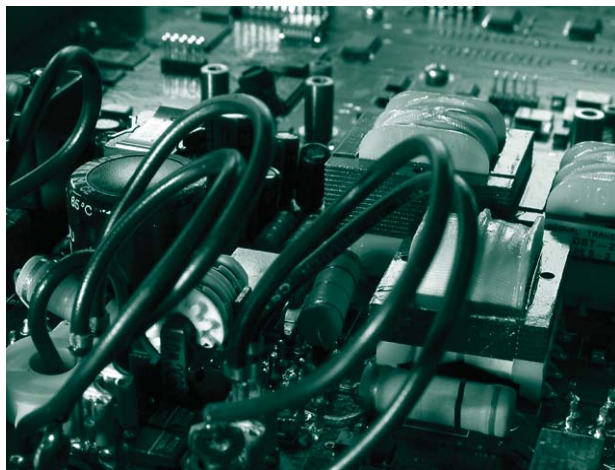

MT Difference: Dual materials produced in multishot tool and press result in unique design, lower cost, better function

VALMARK IND. - Labels, Membrane Switches and Shielding for EMI/RFI and ESD

www.valmark.com

Focus: Membrane switches and graphic panel overlays; Flexographic and screen printing of all types of labels

MT Difference: Superior print capabilities mean the best look and interface for your product; Cost effective shielding

CONTRACT MANUFACTURING

AYRSHIRE ELECTRONICS - Electronic Manufacturing Services

www.ayrshireusa.com 

Focus: Full service PCBA and turnkey contract manufacturing

MT Difference: Fast-turn prototype area; High speed through-hole equipment: 25,000 components per hour; BGA and fine pitch; ICT & product testing; 4 US facilities and low-cost options in Mexico and Asia offer competitive pricing for a variety of requirements
